IMPORTANT NOTES

Imagelab exercises extreme care in handling film, print, art or digital files; however, the receipt of any such material by imagelab for processing or any other purpose constitutes an agreement by you that if such film, print or art is damaged or lost by us it will be replaced with an equivalent amount of unexposed film, paper or the value of raw materials.

Except for such replacement the handling of such film, print, art or digital files by us is without warranty or liability.

SUPPLIED DIGITAL FILES

Files should be set up as per Imagelab's file specifications, typically as RGB, TIFFs or JPEGs (please see "File Specs").

COLOUR MATCHING

If colour matching is required, it is important that any colour samples are supplied at the time of ordering. Imagelab will endeavour to match as closely as possible to your sample(s). It should be noted however that absolutely accurate matches are not always possible due to different print processes, synthetic fabrics and the nature of certain fluorescent colours.

SIZES AND CROPPING

Print sizes may vary due to the proportion of original files or film originals. Unless we are asked to crop, it is Imagelab's normal practice to print the full image area.

ADDITIONAL PRICES

Refer to more than one from the same original.

PAPER SURFACE

Unless otherwise requested, prints will be matt surface except for metallic and flex products which will be on gloss surface and auto prints as listed.

COLOUR MANAGEMENT

Please see our website to download the appropriate profile and specification.

VOLUME PRICES

Refer to additional images from the same original made at the same time. For larger volumes please ask for quotation.

SERVICE TIMES AND RUSH RATES

Imagelab will always endeavour to meet your deadlines within our normal rates. Urgent jobs however, may incur rush surcharges.

PRICES

All list prices are shown excluding GST. We reserve the right to make alterations to the price list without prior notice.

DISPUTES AND RETURNS

Advice of any dispute or request for credit will only be considered if brought to Imagelab's attention within seven days of supply. Any such items must be returned for Imagelab's inspection.

PRINTING FROM FILES “DIGI - PRINTS”

From digital cameras, digital files, transparencies or negatives and little brother to our *Digital Master Prints*.

Digi-prints are batch scanned and machine printed. For larger images, critical colour matching, heavy cropping, *burning in* or *dodging* refer to *Digital Master Prints*.

- Make sure that your digital files are setup correctly. They should be RGB JPEGs or TIFFs and must be set to the correct output dimensions.
- For 10 x 15cm (4R) and 12.5 x 18cm (5R) prints from negatives refer Auto Prints
- For red-eye removal, add \$2.00 per person.
- For cropping (10 x 15 and 12.5 x 18 only), add \$2.00 per image.

...PRINTING FROM FILES OR FILM “LAMBDA DIGITAL MASTER PRINTS”

LAMBDA DIGITAL MASTER PRINTS

From digital cameras, digital files, transparencies and negatives or reflection copies

The ultimate in quality! Digital Master Prints are laser imaged from a digital file direct onto photographic paper. Clear, crisp and precise detail with true, pure and brilliant colour. Simply superior prints! Digital files should be supplied in RGB as set out in our file specification sheet. Any file preparation can be quoted for on application.

- File specifications can be obtained from reception or www.imagelab.co.nz
- For metallic paper, add 20% to print prices.
- Volume requirements by quotation

LAMBDA DIGITAL MASTER FLEX

Plastic based display material. As for DMPs and DMTs. Laser imaged from your digital file, transparency or negative direct onto this robust and durable product. Ideal for images that will be rolled or will have excessive handling.

Pricing as per Duratrans (DMTs).

APPROVAL PRINTS

Up to 28 x 35cm	30.00
Up to 50 x 60cm	40.00
Slash test to size for murals	50.00

RHO “PRINT TO ANYTHING SOLUTIONS”

The Durst Rho prints high res images directly on to both rigid substrates and roll media, presenting massive opportunities for both indoor and outdoor graphic applications.

The range of substrates, both rigid and roll is vast and includes: acrylic, paylite, rigid PVC, aluminium composites, coreflute, steel, glass, foamboards – as well canvas, self adhesive vinyl, banner vinyls and backlit materials and so many more.

Please enquire as to options and prices

The Rho uses UV cured CMYK inks that are instantly dry, waterproof, weather resistant and environmentally safe. Better yet, direct to substrate prints are stable and won't shrink, peel or de-laminate.

WHITE INK

With the Rho, you can even print white – as an under-print colour, over-print, spot or white fill – so now you can accurately reproduce images onto coloured, natural or clear substrates.

GRAPHIC SIZES

Maximum print width is 2,050mm by continuous length, though sizes will be determined by available substrate or roll media dimensions. The maximum thickness of any substrate is 40mm. The max weight for any single substrate is 40kg.

APPLICATIONS SUPPORTED

Output is supported from most standard Mac and PC software applications (Photoshop, In Design, Freehand, Illustrator etc) For any large format display files, please use either Photoshop, Freehand, In Design or Illustrator set up to 100% of final output size.

HOW TO SET UP YOUR FILES

- Graphics can be output at their final size or as a scaled up version of the original, though please ensure images are at a sufficient resolution for the final output.
- Graphic files should be as CMYK
- Please supply all fonts, both screen and printer or convert all text to paths / outlines.
- Please make sure all linked images are included.
- Please list all applications used to construct the file
- If colour matching is required, please provide PMS colours or a suitable proof.
- Please supply a hard copy visual showing file content.
- Accepted File Transfer Media: (Mac /PC) DVD, CD, USB and Firewire devices and all digital camera media.

IMAGE RESOLUTION

Resolutions are at final size. Please see the resolution chart (File Specs) or call for assistance

PRINTING FROM FILM “AUTO PRINTS”

- Service times may vary with requirements. Please enquire.
- Print sizes may vary depending on format.
- For cross process and sepia, add 20% to print prices.
- For red-eye removal, add \$1.20 per person.
- For single 35mm frames, add .50c per for mounting.
- Duplicate CD - \$12.00

* For E6 and B&W process add \$3.00

For prints from digital cameras, digital files, transparencies or cropping refer “Digi-prints”.

RAW TO READY FILE PROCESSING

Have your RAW files efficiently and economically converted to high res TIFFs, to DNG format or downsized as JPEGs. Choose from a range of options that include profiling, re-naming, the inclusion of copyright or metadata as well as applying sharpening and contrast – with white balance and / or exposure corrections as extra options.

Batch Processing can include any of the following options:

- Conversion to Tiffs
- Conversion to DNG
- Naming
- Copyright
- Sharpening
- Conversion to Jpegs
- Profiling
- Re-sizing
- Metadata

Additional Individual Image Processing including:

- Basic white balance colour correction
- Basic exposure correction
- Basic contrast adjustment
- CMYK conversion

BATCH PRICING

Min Price	\$50.00
1 Gb to 8Gb	\$75.00 per Gb
8Gb to 16 Gb	\$60.00 per Gb
16 Gb plus	\$50.00 per Gb
Pricing includes DVD's. Other storage by quotation	

INDIVIDUAL PRICING

Min Price	\$1.00 per image
Complex corrections, retouch and CMYK by quotation	

LAMINATING

Protect your graphics and images.
